C. About MyTradeStaking.com

Brief Description

As “restless spirits” we are, and people who are always trying to find solutions to problems that concern investment in space of the Blockchain Industry and Trading in any kind of market (not only cryptocurrencies), we made the thought and we have the idea that there is a positive opportunity between CFD Market and Cryptocurrencies Market.

The whole idea is to provide our users the possibility to follow our CFDs choices, by using Blockchain Technologies through the MyTradeStaking.com platform and MCFD Token.

MyTradeStaking.com Expert Advisor will always open trading positions in both directions (Shorts or Longs), as we are unsure which way the market will move therefore, we always open positions in both directions for profit opportunities.

In this way and throw the Strategies we are using:

- ❖ Grid Strategy
- ❖ Averaging Strategy
- ❖ Pyramiding Strategy
- ❖ Martingale Strategy
- ❖ Money Management Strategy
- ❖ Lot Management Strategy

...we will be able to provide the user with passive and standard profits from this trading process.

Users will be able to participate in this idea, by purchasing and staking MCFD Tokens through different cryptocurrencies.

Users will be able to purchase MCFD Tokens by using:

- ❖ USDT (Tether)
- ❖ USDC (USD Coin)
- ❖ BTC (Bitcoin)
- ❖ ETH (Ethereum)
- ❖ BNB (Binance Coin)
- ❖ MATIC (Polygon)
- ❖ AVAX (Avalanche)

...to purchase MCFD Tokens, and after they will stake their Tokens through our platform and our pool.

At last, users will have the possibility to choose the staking duration as follows:

- ❖ Three (3) Months Staking Duration
- ❖ Six (6) Months Staking Duration
- ❖ Twelve (12) Months Staking Duration

MyTradeStaking.com and MCFD Token will provide users with a Daily Annual Percent Yield of one and a half percent (1.5%).

The biggest advantage of our project is that the idea is unique as does not exist at the moment in the Blockchain Industry, something similar or reliable, that will be able to offer to the users the CFD opportunity between markets, but at the same moment, users to feel secure and positive that their investments will have good performance in the short-term and long-term durations.

What CFDs are and how do they work

CFDs or "Contracts on Difference" are financial products that are constantly increasing their market share and allow trading in stocks, indices, commodities, and exchange rates. Their development began in London in the 1990s.

CFDs are contracts between two counterparties, the CFD provider and its client, that are traded over the counter (OTC).

CFDs are "derivatives" that offer investors the opportunity to take advantage of price fluctuations in "underlying" financial products, such as stocks, indices, etc., whose prices they reflect.

CFDs do not result in the physical delivery of the underlying product. For example, the purchase of oil CFDs does not involve the delivery of "black gold" barrels to the investor's address.

By opening a CFD position, the investor pays the spread, i.e., the difference between the bid price and the selling price (ask). The spread is the basic gross profit of the brokerage firm providing the service. At the close of the position, the liquidation is done in cash based on the difference in the opening and closing prices, and on the number of contracts that the investor had.

The CFD uses leverage, i.e., the exposure it offers to the market is equivalent to funds of much higher value than those committed to open the position. The margin is the amount (pledge) held in the account as collateral when the investor opens and holds a CFD position.

The insurance margin required to open a position varies based on the characteristics of the underlying financial product (liquidity, range), general market conditions (cost of money, trend, volatility), and the policy of each provider. The use of leverage, which equates to the use of additional funds from those in the investor's account, entails a certain rollover charge for each day that the leverage position remains open.

For example, a provider may require a 1% insurance margin for CFDs on the DAX. This means that the investor must have in his account and commit 100 Euros even though the nominal value of a CFD contract in DAX is equal to € 10,000 (price March 16th).

In other words, the investor "controls" a position worth 10,000 Euros with just 100 Euros. Leverage in CFD trading requires great care, as it works multiplier in both profits and losses.

Benefits of Users from CFDs and Brief Example

The popularity of CFDs is due to the multitude of advantages they offer, such as:

- ❖ The small initial capital required to open a CFD trading account gives access to global markets even to very "small" investors.
- ❖ A Huge range of products offered by CFD companies provides the ability to diversify the investment portfolio of short-term and long-term investors with commodities, foreign exchange stocks, bonds, etc.
- ❖ The possibility of making a profit in both upward and downward markets, as short positions are allowed to open.
- ❖ The use of high leverage, which can lead to large profits (but also large losses).
- ❖ The cost of transactions (bid-ask spread) is low due to intense competition between different providers, which makes CFDs ideal for day trading and other short-term holding tactics.
- ❖ Execution, confirmation, monitoring, and liquidation of transactions are done easily and quickly in the electronic application ("platform") of the provider.
- ❖ The ability to hedge the market risk that exists in an investment portfolio. For example, an investor holding a position in US stocks can "sort" the CFD of the Dow-Jones index, thus achieving a partial guarantee in case of market decline.
- ❖ CFD shares lower the cost of participating in this market cheaply as they are not burdened with additional fees, such as transfers, stock market costs, and taxes on the stock exchange transaction.
- ❖ CFD indices offer the possibility of placing on the market without requiring the purchase of individual shares.
- ❖ Commodity CFDs offer the possibility of opening positions that have a much lower face value than the respective Futures, which usually involve a large amount of the underlying product and require large margins of insurance. For example, an S.M.E. WTI crude oil is about 1,000 barrels, while the CFD of the same product allows trading in smaller quantities and therefore greater flexibility and accessibility to investors who have accounts of limited size.

CFD Transaction Example

Suppose the investor estimates that Dow Jones will move up in the next period and buys 5 CFDs on the index, on the platform of the company with which he works.

This means that the investor will gain 5 euros for each rise and lose 5 euros for each fall in the Dow Jones index.

Before making the desired transaction, the investor must have the insurance margin required for it available in his account. Suppose that for CFDs in the Dow-Jones the required margin is 1%.

Given that the index trades at 17,300 points (March 16 price), the investor should have 173 euros (1% of 17,300) available in his account to open a CFD contract. For the opening of the 5 contracts of this example, it should have 865 euros (5 out of 173) available.

The total value of the position is 86,500 euros (5 out of 17,300). Suppose that when it closes, the Dow is at 17,400 points, which is 100 points higher than the opening price.

The total profit of the investor will then correspond to 500 euros (5 out of 100) minus the spread he paid for the opening of the position, minus the cost of financing the position (rollover).

Given the high volatility of the markets and the high leverage offered by CFDs (100 to 1 or more), investors have to place stop-loss orders in all their positions and risk only a small part of the portfolio. In each position to increase their chances of longevity and success in the markets.

Regarding the choice of provider for CFD trading services, the interested clients should evaluate it based on the principles that supervise it, its history and size, and the coverage of its client's funds by a robust

Compensation System, the reliability and transaction costs, the range of products offered, etc.

D. About MCFD Token

Type of Token

MCFD Token is a Multichain, ultra-scalable, security, and utility Token.

MyTradeStaking.com will get represented by MCFD Multichain Token. MCFD Token is an ERC20 Token that will get deployed in:

- ❖ Ethereum Network

<https://etherscan.io/address/0x92f729c4754774F0D0f4D205bF9776aA2459f542>

- ❖ Binance Smart Chain

<https://bscscan.com/token/0x92f729c4754774F0D0f4D205bF9776aA2459f542>

- ❖ Polygon Network

<https://polygonscan.com/address/0x92f729c4754774F0D0f4D205bF9776aA2459f542>

- ❖ Avalanche Network

<https://snowtrace.io/address/0x92f729c4754774F0D0f4D205bF9776aA2459f542>

Users to be able to participate in the Staking will need to purchase MCFD Tokens or exchange their cryptocurrencies for MCFD Tokens and transact with them through the **MyTradeStaking.com** platform.

MCFD Token and Networks

As we mentioned above, MCFD Token is a Multichain Token as it is generated as an ERC20 Token and it is deployed in Ethereum Network, Binance Smart Chain, Polygon Network, and Avalanche Network.

By supporting all those networks, we will be able to give users the ability to exchange, interact and transact their cryptocurrencies to MCFD Tokens, **with limited fees**.

MCFD Token and Smart Contracts

MCFD Token is get supported by **two (2) different smart contracts**.

The first (1st) smart contract is an **ERC20** smart contract that supports the MCFD Token itself.

The second (2nd) smart contract is based on **ERC721** smart contract development, and it will support the staking process of the MCFD Token.

Both smart contracts will cross-chain each other and in this way, MCFD Token holders and users will be able to transact with one Token that it provides:

- ❖ Scalability
- ❖ Security
- ❖ Utilization
- ❖ Speedy
- ❖ Low Fees

E. Solutions and Problems MCFD Token is going to resolve

Succinct Description

The MCFD Token's main objective is to allow users to invest, interact and transact in the **MyTradeStaking.com** platform.

Users, by purchasing/exchanging MCFD Tokens, automatically will be holders of the main cryptocurrency of the **MyTradeStaking.com** platform, and they will be allowed to proceed into the staking. Analytically, users will be able to use the following cryptocurrencies to be able to buy/exchange MCFD Tokens:

- ❖ USDT
- ❖ USDC
- ❖ BTC
- ❖ ETH
- ❖ BNB
- ❖ MATIC
- ❖ AVAX

Market Problem and Solution

Unfortunately for the Markets and Investors, and fortunately for MyTradeStaking Team, the only way for investors, to trade cryptocurrencies, together with other markets, is to get registered into exchange platforms that they are providing a mix of markets for trading.

MCFD Token's use is unique and pioneer as it is providing the ability to the users to do the following:

- ❖ Simple Investment
- ❖ Holding
- ❖ Trading Cryptocurrencies
- ❖ Trading Forex
- ❖ Trading Futures
- ❖ Trading Commodities
- ❖ Staking

...without the necessity of any exchange platform, as at the moment, is the only cryptocurrency able to provide the above services all in one? This allows us to believe in the success of the Token and the whole project, in long term as the demands on the Trading Industry are increasing rapidly year by year.

F. MCFD Tokens Allocation and Tokenomics

Allocation

❖ MCFD Tokens Allocation

❖ Allocation Definitions

Category	Total Tokens	Representation
Total Supply of The MCFD Token	2,222,222,222.00 billion Tokens	100%
Circulating Supply - Liquidity	597,766,094.59 million Tokens	26.90%
Staking	849,996,624.00 million Tokens	38.25%
Company's Holdings	72,237,282.13 million Tokens	3.25%
Blockchain Development	333,333,333.30 million Tokens	15.00%
Partners and Sponsors	168,888,888.00 million Tokens	7.60%
Marketing	111,111,111.10 million Tokens	5%
Trading Experts and Advisers	66,666,666.66 million Tokens	3%
Airdrops	22,222,222.22 million Tokens	1%

❖ TOTAL SUPPLY is 2,222,222,222.00 billion MCFD Tokens

The MCFD Token Total Supply cannot increase or decrease as you cannot mine it or burn it. The total Supply will always remain standard. Also, in the staking process, users will receive APY in MCFD Tokens.

❖ CIRCULATING SUPPLY - LIQUIDITY is 597,766,094.59 million MCFD Tokens

The MCFD Token Circulating Supply is 597,766,094.59 and will be available in public for trading, holding, investing, interacting, and transacting, accordingly.

❖ **STAKING SUPPLY is 849,996,624.00 million MCFD Tokens**

Thirty-eight and twenty-five percent (38.25%) of the Total Supply of MCFD Tokens will be available for staking. Staking APY is one and a half percent (1.5%) daily.

Note: Circulating Supply and Staking Supply are both the TOTAL Circulating Supply

❖ **COMPANY'S HOLDINGS SUPPLY is 72,237,282.13 million MCFD Tokens**

The specific supply, seven percent (7%) will be locked for two years (2) and with the perspective to renew this locking for another three (3) years. This supply will not be tradeable for those specific periods.

❖ **BLOCKCHAIN DEVELOPMENT SUPPLY is 333,333,333.30 million MCFD Tokens**

From the specific supply, twelve percent (12%) will be also locked for two years (2) and with the perspective to renew this locking for another three (3) years. The rest of four percent (3%) will be used to pay for the company's current expenses (notary fees, trustees, salaries, taxes, etc.) as well as for the development part of the Project. Distribution of the current amount of supply will be done in five (5) years.

❖ **PARTNERS and SPONSORS SUPPLY IS 168,888,888.00 million MCFD Tokens**

Shares for MCFD partners, companies, and cryptographic projects.

❖ **MARKETING and PROMOTION SUPPLY is 111,111,111.10 million MCFD Tokens**

Five percent (5%) of the Total MCFD supply will get allocated for Marketing and Promotion partnerships.

❖ **TRADING EXPERTS and ADVISERS SUPPLY is 66,666,666.66 million Tokens**

Three percent (3%) of the Total MCFD supply will get allocated to our Trading Experts and Trading Advisers.

❖ **AIRDROPS SUPPLY is 22,222,222.22 million Tokens**

One percent (1%) of the Total MCFD supply will get allocated to our communities through Airdrops according to the MCFD Road Map.

Tokenomics

❖ **MCFD Token Tokenomics**

In recent years, blockchain technology has become more widely adopted, and it will undoubtedly become ubiquitous shortly.

For a forward-thinking project like MCFD, blockchain is the ideal ally. It enables the storage and transmission of data (in this case, transactions) without the need for a central intermediary.

Above all, the blockchain allows individuals to connect, allowing people from all over the world to participate in projects like the MyTradeStaking.com Platform.

Indeed, it would appear impossible for an American to invest in European and Arabian Gulf assets without dealing with the administrative and banking issues that blockchain can resolve from Medium-term to Long-term.

Tokenomics is the economy of Cryptocurrencies. It describes fluctuations in supply and demand for different types of Cryptocurrencies studies the mechanisms by which this new market develops and describes the rules that determine the path of development of the tokens of each currency.

Tokenomics can be considered part of the economy — and just like the term "economy", the term "Tokenomics" can have two meanings:

- ❖ The science that studies the laws by which the world of Cryptocurrencies operates.
- ❖ The process of movement (growth, scaling, value) of different Cryptocurrencies and the entire set of Cryptocurrencies as a whole.

In the following sections, we are going to analyze all the above Tokenomics factors according to MVRL Token abilities.

❖ **MyTradeStaking.com Annual Percent Yields and Investments**

Users, by staking MCFD Tokens will receive Annual Percent Yields of one and a half percent (1.5%) daily.

Users will have the possibility to choose the staking duration between:

- ❖ Three (3) Months Staking Duration
- ❖ Six (6) Months Staking Duration
- ❖ Twelve (12) Months Staking Duration

Let's accept that the User chooses to stake his funds for three (3) months. As a result, we will have the example below:

Example,

A user stake 15,000.00 MCFD Tokens

On the first day, he will receive,

$15,000.00 + 1.5\% = 15,225$ MCFD Tokens

On the second day, he will receive,

$15,225.00 + 1.5\% = 15,453.375$ MCFD Tokens

On the third day, he will receive,

$15,453.375 + 1.5\% = 15,685.175625$ MCFD Tokens

.

.

At the end of the three (3) months duration user will receive the total amount of **57,284.22758540 MCFD Tokens.**

The three (3) months APY is equal to **three hundred eighty-one and nine percent (381.90%).**

Analytically,

If user,

- ❖ Stakes 15,000.00 MCFD Tokens for three months he will receive **381.90% APY**
- ❖ Stakes 15,000.00 MCFD Tokens for six months, he will receive **1,458.43% APY**
- ❖ Stakes 15,000.00 MCFD Tokens for one year, he will receive **21,270.38% APY**

The mathematic formula is:

$$\text{AMOUNT OF MCFD TOKENS} \times (\text{DAY} + \text{PERCENT})^{\text{DAYS}} = \text{APY (FOR 3 MONTHS)}$$

❖ MCFD Token Pairings

The MCFD Token will be available for purchasing and staking through the following pairings:

- ❖ MCFD/USDT
- ❖ MCFD/USDC (Upcoming)
- ❖ MCFD/BTC
- ❖ MCFD/ETH
- ❖ MCFD/BNB (Upcoming)

Through the **MyTradeStaking.com** platform, users will be able to purchase and stake MCFD Token with an extra two pairs:

- ❖ MCFD/MATIC (Upcoming)
- ❖ MCFD/AVAX (Upcoming)

❖ MCFD Token Transaction Fees

For each transaction (purchase, sale, or staking), a total of 0.4 percent (0.4%) of the transaction cost is withdrawn as an MCFD.

❖ MCFD Token Value Proposition

A value proposition is a promise of value to be delivered, communicated, and acknowledged. It is also a belief from the customer about how value will be delivered, experienced, and acquired. A value proposition can apply to an entire organization, or parts thereof, customer accounts, or products or services. Below we are analyzing and explaining the value proposition of The MCFD Token.

The MCFD Token provides a way for its current and future users, how is going to state the problem that the token is solving and which solution is going to provide.

MyTradeStaking and MCFD Token

Customer

The issue of security is central to any project, especially in the Cryptocurrency environment. It is crucial for a project like MCFD to provide investors with all guarantees regarding the safety of the project

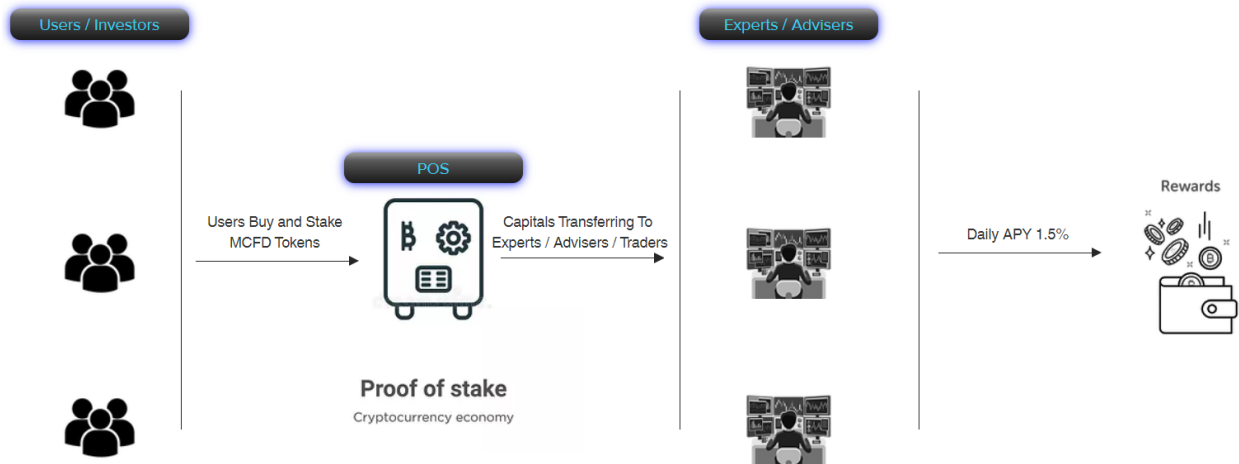

Problem

To guard against security breaches, The MVRL token contract will get audited by the external company Certik for six months (<https://www.certik.com>) The audit report will be available soon.

Solution

G. How does MyTradeStaking work

MCFD Token Flowchart

[MCFD FLOWCHART \(CLICK THE IMAGE\)](#)

Steps and Benefits

❖ Steps

Step 1

- Read carefully the Flowchart
- Connect your wallet
- Purchase / Exchange MCFD Tokens

Step 2

- Choose the Amount of MCFD Tokens for Staking
- Choose your Staking Duration

Step 3

- Get Rewarded with Daily APY 1.5%
- Withdraw your funds once the staking process expires

❖ Benefits

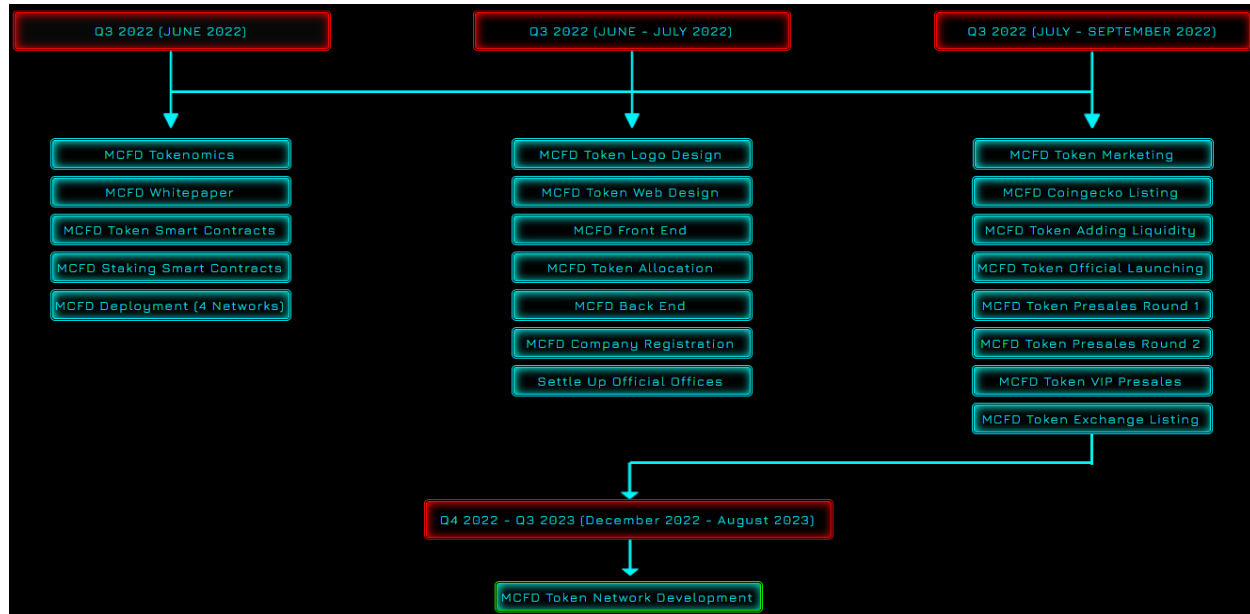

By purchasing and staking MCFD Tokens for a specific duration, users will get benefits as follows:

- Three Months Staking Duration = > **381.90% APY**

- Six Months Staking Duration => **1,458.43% APY**
- Twelve Months Staking Duration => **21,270.38% APY**

H. MyTradeStaking.com and MCFD Token Road Map

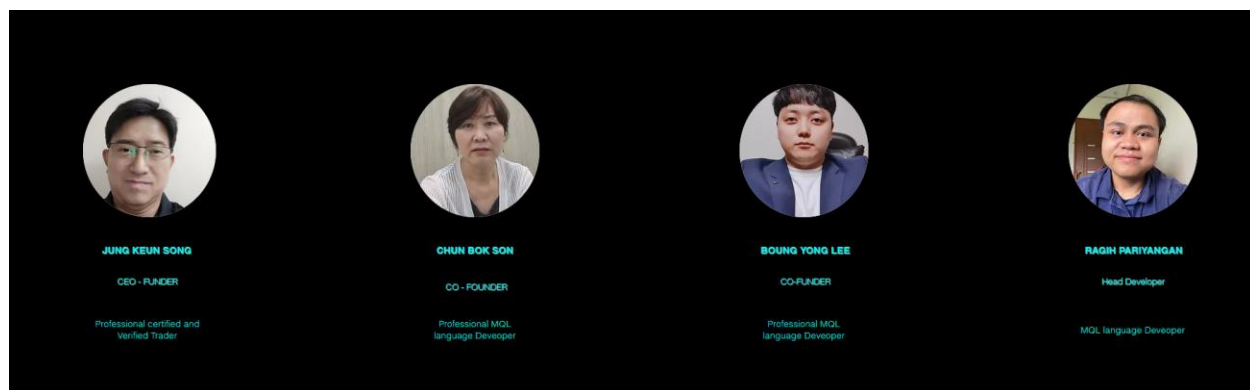

MCFD Token Road Map

[MCFD ROAD MAP \(CLICK THE IMAGE\)](#)

I. MyTradeStaking.com and MCFD Token Team and Conclusion

Our Team

Conclusion

Only one word represents our Mission and Targets and this word is no other than PIONEER.

MyTradeStaking.com Team is here to Pioneer in the Blockchain Industry by completing one of the largest if not the largest, Staking and Trading platforms.

MyTradeStaking.com Team understands completely the levels of difficulties, competition, and demands of this specific Blockchain field and for those reasons, we “equipped” our Team with Talented and Experienced Blockchain Developers.

Legality, reliability, honesty, and responsibility are the words that represent and reflect our Team’s characters and personalities.

Communication with our members and communities is a field we would like to pay extra attention to, as we recognize the necessity to have big support from our community. For this reason, a special Forum inside our platform will get developed in the nearest future.

Attention from our members, to our social media portals, will be required as we plan to complete the project according to our road map and without any delays.

MyTradeStaking.com platform and MCFD Token have immense potential to revolutionize our lifestyles, providing a virtual environment that blurs the line between Cryptocurrency Market and Traditional Markets

While the MCFD token is gaining popularity, users should always do their research before making a purchase or an investment, as knowledge is a key to success.

Thank you for reading our Whitepaper and thank you for being a part of our Mission and Vision.

We will be glad to meet you and discuss with you further through our Future Conferences Opportunities.
